INSIDE THE BOX

- Device
- Power adaptor

Plug IN YOUR DEVICE

Plug the included power adapter into the device and then into a power outlet. In about a minute, the display will turn on and you will hear the greeting from the device.

DOWNLOAD THE APP

Download the free app to your phone or tablet, opening the app will immediately start the setup process. During setup, you will connect the device to the Internet, so you will need your Wi-Fi password.

THINGS TO TRY

The “Things to Try” card included in this guide provides examples of things you can ask the device. Keep this card to help you get started.

Product Information

Safety and Compliance Information

Using Your Device Around Other Electronic Devices

The Device, uses, and can radiate radio frequency (RF) energy and, if not used in accordance with its instructions, may cause interference to radio communications and electronic equipment. External RF signals may affect improperly installed or inadequately shielded electronic operating systems, entertainment systems, and personal medical devices.

While most modern electronic equipment is shielded from external RF signals, if in doubt, check with the manufacturer. For personal medical devices (such as pacemakers and hearing aids), consult with your physician or the manufacturer to determine if they are adequately shielded from external RF signals.

There are some places where RF signals could constitute a hazard, such as health care facilities, and construction sites. If you are not sure, look around for signs indicating that two-way radios or mobile phones should be turned off.

FCC Compliance Information

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Changes or modifications that are not expressly approved by the party responsible for compliance could make the device no longer comply with the FCC Rules.

Information Regarding Exposure to Radio Frequency Energy

The output power of the radio technology used in the Device is below the radio frequency exposure limits set by the Federal Communications Commission of the United States (FCC) and Industrial Canada for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20 cm between the radiator & your body.

Product Specifications

Model: VN94DQ

Power: 12VDC 1.25A output power adapter (Sold in-box)

Operating temperature — 32°F to 95°F (0°C to 35°C).
